PROFILE SUMMARY

Senior Power BI Developer with 7+ years of experience delivering end-to-end business intelligence solutions in investment banking, hedge fund, and financial services domains. Specialized in building scalable dashboards, optimized data models, and KPI-driven analytics that enable real-time, data-driven decision-making. Expert in Power BI, DAX, Power Query (M), and SQL, with strong experience integrating enterprise data from AWS Aurora and relational databases.

CORE SKILLS

Power BI | DAX | Power Query (M) | Data Modeling (Star Schema) | SQL | PostgreSQL | MSSQL | AWS Aurora | ETL | Data Visualization | Delphix | Azure

PROFESSIONAL EXPERIENCE

Accenture Jul 2023 – Present

Senior Data Analyst

Project: CIO Projects

- Designed and delivered interactive Power BI dashboards for investment banking leadership, enabling real-time KPI tracking, financial analytics, and faster decision-making.
- Built optimized star schema data models and advanced DAX measures for investment banking, financial, and operational reporting.
- Integrated and transformed data from AWS Aurora (PostgreSQL) and SQL Server, ensuring scalability and consistency.
- Automated reporting workflows, reducing manual effort by ~40% and improving turnaround time significantly.
- Collaborated closely with investment banking stakeholders to gather reporting requirements and deliver actionable insights through data visualization.
- Improved report performance through efficient data modeling and query optimization.

Accenture Dec 2021 – Jun 2023

Senior Data Analyst

Project: Moderna

- Led migration of MSSQL databases to PostgreSQL on AWS Aurora and supported Power BI reporting integration for scalable analytics solutions.
- Optimized complex SQL queries and backend datasets to improve Power BI dashboard performance and data processing efficiency.
- Implemented Delphix data virtualization and enabled efficient data provisioning for Power BI reporting and analytics.
- Contributed to enterprise data modernization and cloud transformation initiatives.

BNY Mellon Technologies Jul 2018 – Nov 2021

Application Developer

Project: Hedgemark

- Developed risk analytics and reporting solutions for hedge fund clients as part of a hedge fund-related financial services project.
- Built complex SQL queries, stored procedures, and ETL pipelines for large datasets.
- Performed performance tuning and production support for critical financial systems.
- Delivered accurate and timely reports to global stakeholders.

KEY PROJECT - POWER BI ANALYTICS DASHBOARD

- Designed and developed an enterprise-level Power BI dashboard for KPI and financial reporting.
- Built a scalable star schema data model and implemented advanced DAX calculations.
- Integrated multiple data sources including AWS Aurora and SQL Server into a unified reporting layer.
- Enabled drill-down, dynamic filtering, and interactive insights for business users.
- Reduced manual reporting effort by 40-50% and improved decision-making efficiency.
- Established a single source of truth for business-critical data.
