PRATEEK SINGH

Noida, UP | prateeksinghdeo012@gmail.com | +91 6392301488 | LinkedIn | GitHub

Professional Summary

AI Developer and Python/Django Developer with hands-on experience building intelligent systems and APIs. Skilled in modern LLMs (OpenAI, Gemini, LLAMA) and full AI pipelines using vector databases, RAG, and deep learning models. Strong background in backend development using FastAPI, SQL, and scalable architectures.

EDUCATION

MCA - Master of Computer Applications — *Dr. RML Avadh University*
2021 – 2023 — Percentage: 69.5%

BCA - Bachelor of Computer Applications — *Dr. RML Avadh University*
2018 – 2021 — Percentage: 67.7%

Experience

VOCSO Technologies Pvt. Ltd. — **December 2024 – Present**
Python AI Developer — *Faridabad, Haryana*

- Built intelligent systems using FastAPI, OpenAI APIs, MSSQL, and FAISS for vector search.
- Developed backend architecture for LLM-based enterprise tools and prompt-driven platforms.
- Designed and implemented modular APIs using FastAPI, integrated with OpenAI GPT models to support prompt chaining, semantic search, and Q&A generation.
- Integrated external APIs (OpenAI, HuggingFace) with internal knowledge bases, ensuring low-latency vector search and real-time prompt completions.

Clothwari Printing Pvt. Ltd. — **May 2024 – September 2024**
AI Developer — *Delhi*

- Generated images using Gemini and OpenAI with Vertex AI tools based on text prompts.
- Built image prediction models and automated image generation pipelines.

Surepass Technologies Pvt. Ltd. — **March 2024 – May 2024**
Machine Learning Intern — *Delhi*

- Processed text image data using YOLOv8, DeepFace, built a passport recognition system.
- Created desktop apps using Tkinter and Streamlit for data interface

Technical Projects

Conversational BI System | *OpenAI, FastAPI, MSSQL, FAISS* — **March 2025**

- Built an intelligent Q&A system that converts natural language queries into SQL, fetches data from MSSQL, and displays insights using FAISS + OpenAI.
- Implemented a vector-based semantic layer using FAISS to match user intent with database schema and optimize SQL generation accuracy.

Document Reader with LLAMA2 | *LLAMA2, LangChain, ChromaDB, HuggingFace* — **July 2024**

- Trained and embedded documents using LLAMA2 + HuggingFace models; built a retrieval-based Q&A system using LangChain pipelines and ChromaDB.
- Integrated chunking and metadata tagging to improve context relevance and answer accuracy in document-based question answering.
- Optimized LangChain retriever chains and prompt templates for faster response generation and better alignment with user queries.

Social Media Backend API | *Django, Django REST Framework, PostgreSQL* — **April 2024**

- Designed and developed scalable backend APIs using **Django REST Framework** for a Twitter-like social platform.
- Implemented authentication, post creation, editing, and deletion features with role-based access control and JWT support.
- Built modular endpoints for user profiles, feeds, and likes/comments, ensuring clean architecture and RESTful principles.

Technical Skills

Programming Languages: Python, Django, FastAPI, HTML, CSS, Bootstrap
AI Development: OpenAI, Gemini, LLAMA, LangChain, Agentic AI, RAG, Vector DB
Deep Learning: ANN, CNN, RNN, YOLOv8, TensorFlow
Machine Learning: SVM, KNN, Naive Bayes, Logistic Regression, Decision Tree, KMeans, NLP, Scikit-Learn
Web Scraping: Selenium, Scrapy, BeautifulSoup
Data Analysis: NumPy, Pandas, Matplotlib, Seaborn
Databases: MySQL, PostgreSQL
DevOps & Tools: Git, Docker, Postman, Power BI, OCR, CI/CD, Postman
