RAMAKANT KAUSHIK

AI Engineer | Gurgaon, India

ramakantkaus@gmail.com | www.linkedin.com/in/kausramakant | github.com/ramakantkaus-sys | ramakantportfolipage.netlify.app

PROFESSIONAL SUMMARY

Passionate AI professional and AI engineer with a strong foundation in building intelligent systems. Specialized in Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and conversational AI. Skilled in developing scalable AI solutions using modern frameworks like LangChain, LangGraph, and transformer architectures to deliver impactful, production-ready applications.

CORE COMPETENCIES

AI Engineering & LLM Systems: Large Language Models (LLMs), GPT-based systems, open-source transformers, Retrieval-Augmented Generation (RAG), embeddings, vector search, FAISS, Prompt engineering, context management, structured output generation, LangChain, LangGraph, tool calling, multi-step reasoning workflows, Conversational AI, document Q&A; systems, AI agents
NLP & Generative AI: Transformer architectures, Hugging Face Transformers, Text generation, summarization, classification, Named Entity Recognition (NER), sentiment & emotion analysis
Deep Learning: Neural Networks (ANN, CNN, RNN, LSTM, GRU), Transformers, transfer learning, TensorFlow, PyTorch, Keras
Machine Learning (Supporting): Supervised & unsupervised learning, Feature engineering, Model evaluation and fine-tuning concepts
Automation & Workflow Orchestration: Workflow automation using n8n, Make (Integromat), Zapier, API-driven automation pipelines, Event-based and scheduled workflows, LLM-powered automation and agent workflows
Model Serving & AI Systems: Inference pipelines and request handling, Latency-aware AI system design, Cost-aware LLM usage and optimization strategies
Evaluation, Reliability & Safety: LLM response evaluation techniques, Hallucination reduction strategies, Prompt testing and iteration, Guardrails and failure-handling concepts
Deployment & Integration: API-based AI integration, AI services integration into applications, Environment-aware deployments
Programming & Systems: Python, SQL, Git-based workflows
Professional Skills: Systems thinking, Problem solving, Technical communication, Cross-functional collaboration

PROFESSIONAL EXPERIENCE

Research Associate, AI

Keywords Studios | April 2025 – September 2025

- Trained advanced AI agents for a confidential AGI project, maintaining over 92% accuracy on complex tasks.
- Supported model fine-tuning, alignment, and evaluation across multimodal inputs, improving model consistency, logical reasoning, and adaptability.

Data Science Intern

AAM Infotech Pvt. Ltd. | October 2024 – March 2025

- Experience in Machine Learning, Deep Learning, and NLP projects, including recommender systems and predictive modeling.

PROJECTS

Multimodal Emotion Chatbot

- Built a personal chatbot that detects emotions from facial, vocal, and textual cues using OpenFace, Wav2Vec2, and BERT.
- Enables real-time emotion recognition and adaptive mood-based conversations.

YouTube Transcript Chatbot (RAG-based)

- Developed a RAG-based chatbot using Python, LangChain, GPT-4o-mini, and FAISS for interactive conversations on YouTube transcripts.
- Implemented automated transcript extraction, semantic text chunking, and context-aware Q&A; using vector embeddings.

Movie Recommendation System

- Developed a personalized movie recommender using collaborative filtering, content-based filtering, and NLP-based review analysis.
- Enhanced recommendation accuracy and user experience through feature engineering and model optimization.

ACADEMIC HISTORY

Data Science Professional Course

Ducat India | March 2024 - March 2025

Bachelor of Science (Physics, Chemistry, Mathematics) | 70.6%

KLP College, IGU University | 2020 – 2023

Senior Secondary & Secondary Education | 90%+

RMS Sr. Sec. School, Mohindergarh
