An enthusiastic & high energy- driven professional aiming for challenging assignments in **Infrastructure Security** Professional *with a reputed organisation*

SKILLS

Cisco Certified Specialist Security Core

Next generation FW;
Palo Alto, Checkpoint FW, Cisco ASA FW, Fortinet FW (Panaroma, Forti analyzer)

IPS/IDS (Fire eye HX / NX & McAfee),

WAF – Fortigate, F5 WAF solutions.

Proxy Firewall – Bluecoat & McAfee web gateway proxy solution.

NAC Solution – Forescout & Cisco ISE.

Load balancer – Citrix Netscalar.

Remote VPN Solution;
Accops, Sonicwall, Global Protect

SDWAN – Fortigate & Lavelle.

Routers (ASR-1000R),
switches (Nexus 7K, 9K & catalyst)

ACADEMIC DETAILS

- **BE(EXTC)** from Mumbai University with CGPA 7.9 in 2016
- **Diploma(EXTC)** from Maharashtra University with 65% in 2011

PROFILE SUMMARY

- Senior **Network Security Engineer / Cybersecurity & Infrastructure Security Professional** with nearly 9 years of progressive experience in Network & Security Operations, Project Execution, Network Migrations, and Technical Support. Proven expertise in **designing, implementing, and managing secure enterprise infrastructures** with a strong focus on **cybersecurity, access control, and risk mitigation**.
- Skilled in leading end-to-end planning, deployment, and support of secure network architectures; hands-on experience with **firewalls, proxies, VPNs, IDS/IPS, NAC, and WAF technologies.**
- Strong troubleshooting and incident response capabilities for critical infrastructure security issues in large-scale enterprise environments.
- Experience in implementing continuous improvement and corrective action plans aligned with ITIL and security best practices.
- Experienced in installation of network devices inside racks at **Datacenter & working experience on new POC's**
- Proficient in handling data center infrastructure, including installation, configuration, and maintenance of network devices.
- Experienced in POC implementations for new security products and solutions.
- **Technology Expertise:**
  - Firewalls: Palo Alto (with Panorama), FortiGate (with FortiManager), Cisco ASA, Checkpoint (R80)
  - Proxies: Bluecoat, McAfee
  - NAC & WAF: Forescout, F5 WAF
  - VPN: Accops, SonicWall (IPSec, SSL, Remote VPN)
  - Networking: Cisco Routers (ASR 1000), Switches (Nexus 7K/9K)
  - Ticketing Tools: ServiceNow, BMC Remedy**Having experience on**
- **Knowledge of key CISSP domains including Security & Risk Management, Asset Security, Network Security, and Security Operations**
- Familiar with LAN/WAN management, incident response, endpoint protection, and access control policies
- Actively pursuing roles focused on **Infrastructure Security or Cybersecurity** Engineering, with a long-term goal of aligning with **CISSP** and gaining expertise in **security frameworks such as ISO 27001, PCI-DSS, NIST Cybersecurity Framework (CSF), and CIS Benchmarks**, while progressing toward advanced security leadership responsibilities.

ORGANISATIONAL EXPERIENCE

Aug'2024 – Working : Morningstar India pvt ltd. as Senior Infrastructure Security Engineer

Sep'2020 – Aug'2024 : Ivssg Pvt ltd./ Cybernxt pvt ltd. as Team Lead or Principle CyberSecurity Consultant
Client: IDFC Bank / IDFC Asset Management

Oct'2018 – Sep'2020 : IT Source Pvt. Ltd. / IDC as Senior Network Security Engineer L2
Client: HDFC Ltd / HDFC Sales / HDFC Asset management / HDFC Bank

Dec'2017 - Sep'2018 : Cloudatix Venture Pvt. Ltd. as Network Support Engineer
Client: Railtel ISP

Sep'2016 - Dec'2017 : Orient Technology as Network Support Engineer
Client: Tikona ISP

ROLE & RESPONSIBILITY

Technical skills & resposiblites :-

- Part of a 24×7 rotational shift team providing critical in-life support for enterprise security infrastructure.
- Deliver Level 3 support for complex and escalated security incidents, ensuring timely resolution in line with SLAs.
- Work on complex network security architectures, including handling incidents, changes, and problems across DC (Data Center) and DR (Disaster Recovery) environments.
- Participate in DC/DR drills and manage high-availability configurations for critical security infrastructure.
- Configure and upgrade Infra devices including firewalls, proxies, VPN appliances, and other perimeter security systems.
- Perform advanced troubleshooting and root cause analysis of escalated incidents in collaboration with application support teams in UAT and production environments.
- Familiar with and apply industry-standard security practices and compliance requirements
- Conduct thorough threat detection, incident response, and remediation activities, ensuring containment and recovery.
- Analyze customer network/security posture and propose risk mitigation strategies or architecture improvements.
- Mentor and guide Level 1 analysts; provide operational documentation and ensure knowledge transfer.
- Ensure compliance with Service Level Agreements (SLAs) and internal security policies.
- Collaborate professionally with internal teams and external clients during security incident handling or troubleshooting.
- Troubleshoot and resolve issues related to security policies, firewall rules, device health, and connectivity.
- Act as a Subject Matter Expert (SME) for operational security support and escalations.
- Maintain operational efficiency by adhering to ITIL processes and using ticketing tools such as ServiceNow and Remedy.
- Ensure ongoing compliance with SEBI and other regulatory frameworks by updating the network security model as per latest guidelines and circulars.
- Actively support and respond to internal and external audits; resolve audit findings within defined timelines.
- Perform scheduled security maintenance such as log backups, firewall policy reviews, access audits (VPN, proxy, administrative), and compliance checks.

Management skills & resposiblites :-

- **Team Management**: Responsible for preparing rosters, managing leaves, and organizing shift schedules for 24×7 operations.
- **Project Management**: Handle client communication, prepare and deliver monthly/quarterly presentations covering team performance, task updates, and security compliance status to senior management or steering committees.
- Liaise with **HR** on team performance matters and participate in the **hiring process** by evaluating candidates based on role-specific requirements.
- Lead team development by planning and assigning tasks, mentoring juniors, and providing study materials and technical guidance to enhance skills and knowledge.

HANDS-ON EXPERIENCE IN OPERATION AND MANAGEMENT OF SECURITY INFRASTRUCTURE.

- Minimum 8 years of experience on following products/technologies.
- Operational support experience & Troubleshooting & security policy implementation on all security solution.
- Next generation FW - Palo Alto, Checkpoint FW, Cisco ASA FW, Fortinet FW (Panaroma, Forti analyzer)
- IPS/IDS (Fire eye HX / NX & McAfee), Web Application Firewalls (fortigate, F5)
- Proxy Firewall - Symantec / Bluecoat proxy solutions & McAfee web gateway proxy solution.
- Experience on Identity and Access management solution like Forescout, understanding of Cisco ISE.
- Operational support experience on Load balancer – Citrix Netscalar.
- Experience on Remote VPN solution – Accops Hy-work & sonicwall.
- Hands on experience on SDWAN on fortigate & Lavelle.
- Experience on High end datacenter routers (ASR-1000R) & High end switches (Nexus 7K, 9K) & on Mpls network links.

TECHNICAL SKILLS

- Network Security (CCNA & CCNP+) & Routing, switching (CCNA & CCNP+) & MPLS
- Cisco – Nexus, ISE, Nexus ACI, ASA Firewall, WSA.
- Firewall – Palo alto, Fortigate, ASA, checkpoint.
- Identity and Access management solution – Cisco ISE, Forescout.
- Web application Firewall, Remote VPN solution, Proxy Firewall, Load balancers, End points Security, Email Security.
- Learning – CISSP, ISO 27001, NIST cyberSecurity framework, AWS

PERSONAL DETAILS

Date of Birth: 8th December 1992 | **Languages Known:** Marathi, Hindi & English

Address: Thane West, Mumbai 400602
