Portfolio | LinkedIn

Mobile Application Developer with 3.5 years of experience in designing, developing, and deploying high-performance mobile applications for Android and iOS platforms. Skilled in cross-platform app development using Flutter. Strong expertise in REST APIs, Firebase, and payment gateway integrations. Adept at end-to-end app lifecycle management including architecture design, testing, CI/CD automation, performance optimization, and publishing apps to Google Play Store and App Store. Proven track record of delivering secure, scalable, and user-centric mobile solutions that improve customer engagement and accelerate business growth.

Skills

- **Mobile App Development:** Android, iOS, Cross-Platform
- **Languages & Frameworks:** Dart, Java, C, Flutter, XML
- **Backend & APIs:** REST APIs, Firebase (Firestore, Push Notifications, Crashlytics, Remote Config, Analytics),Retrofit
- **Databases & Storage:** Drift, SharedPreferences
- **App Lifecycle & Deployment:** Google Play Console, App Store Connect, CI/CD (GitHub Actions, Fastlane)
- **Architecture & Patterns:** MVC, MVVM, Clean Architecture
- **Integrations:** Google Maps, Razorpay, Payment Gateways, Native Platform
- **Tools & Collaboration:** Android Studio, VS Code, Xcode, Git, GitHub, Agile
- **Testing & Optimization:** Flutter DevTools, Unit Testing, Mockito, App Performance Optimization

Professional Experience

Kutumbh HRCare, Noida

Mobile App Developer *Jul-2022 to Sep-2025*

Delivered 3 production-grade mobile applications across e-Commerce and Field Service Management (FSM)with proven results in boosting user engagement, reducing defects, and accelerating release cycles. Experienced in end-to-end app lifecycle management from design to deployment, with strong expertise in performance optimization, state management, and cross-functional collaboration.

Key Projects

- **CuDel(e-commerce)-**Developed a home-services booking app enabling customers to browse services, schedule appointments, track orders, and make secure payments.
- **CuDel Business(e-commerce)-**Built a service-partner app for managing bookings,updating availability, tracking earnings, and handling customer requests.
- **WorCo(FSM Application)-**Developed modules for attendance, task assignment, GPS-based live tracking, Dynamic form(just like Google form) and offline location syncing

Responsibilities

- Designed, developed, and deployed 3 production-grade mobile applications across e-Commerce and Field Service Management (FSM).
- Achieved 30% faster performance by optimizing rendering, animations, and widget rebuilds with Flutter DevTools
- Built cross-platform apps (Android/iOS) using Flutter & Dart, reducing release cycles by 30

- Integrated Firebase services (Push Notifications, Crashlytics, Remote Config, Firestore) and third-party SDKs (Google Maps, Razorpay), increasing reliability and user engagement.
- Implemented state management (GetX) and offline-first data storage (Drift, SharedPreferences), improving scalability and user retention.
- Developed native Android/iOS integrations via platform channels to extend functionality beyond Flutter.
- Automated build & release pipelines via CI/CD (GitHub Actions, Fastlane), reducing deployment time by 40%.
- Collaborated with cross-functional teams (PMs, QA, Designers, Backend Developers) to ensure on-time, high-quality delivery.
- Conducted code reviews and mentoring, reducing bugs and enforcing coding best practices.
- Published signed builds to Google Play Store and App Store, ensuring compliance with marketplace guidelines.

Dextrous Infosolutions, Noida

Mobile App Developer *Nov-2025 to present*

Key Projects

- **Exim Bank(Government Project)-**Developed a secure pensioner verification system with live video capture, document uploads, and encrypted API integration to support government authentication processes.
- **Crystalicious(e-commerce)-**Built using the Shopify eCommerce platform (Shopify storefront API), including product listing, cart & checkout, Razorpay integration, and optimized UI flows.
- **Saar(FSM Application)-**Developed modules for attendance, task assignment, GPS-based live tracking, and offline location syncing

Responsibilities

- Delivered 3 production-ready Flutter applications in Government, e-Commerce, and FSM sectors.
- Designed scalable Flutter architecture with modular feature separation for easier maintenance.
- Integrated Firebase services (Crashlytics, Remote Config, Firestore) and third-party SDKs (Google Maps), increasing reliability and user engagement.
- Developed native Android/iOS integrations via platform channels to extend functionality beyond Flutter.
- Collaborated with cross-functional teams (PMs, QA, Designers, Backend Developers) to ensure on-time, high-quality delivery.
- Conducted code reviews and mentoring, reducing bugs and enforcing coding best practices.
- Published signed builds to Google Play Store and App Store, ensuring compliance with marketplace guidelines.
- Improved app stability through debugging, performance tuning, and disciplined testing practices.

Education

B.Tech (Computer Science)

GLA University, Mathura
