Education

Sharda University **Aug. 2023 – Present**
Bachelor of Science in Computer Science *Greater Noida, Uttar Pradesh*

Technical Skills

- **Programming:** Python, C++
- **Backend Engineering:** FastAPI, RESTful APIs, SQLAlchemy, PostgreSQL
- **Conversational AI & Agents:** Agent-based Systems, Conversational Workflows, Context-aware Chat Systems, Prompt Engineering, LLM Pipelines
- **Generative AI & LLMs:** Mistral AI, LLaMA (Groq), Claude (AWS Bedrock), Task Extraction, Summarization
- **Document Intelligence:** OCR (PDF, DOCX), Unstructured Data Processing, Invoice & Email Parsing
- **Cloud & DevOps:** Google Cloud Platform (GCP), AWS, Vertex AI, Jenkins, SonarQube Analysis
- **APIs & Automation:** Workflow Automation, Swagger (OpenAPI), OAuth2 Authentication
- **Web & App Development:** Streamlit, Flask
- **Data & Analytics:** SQL (MySQL, Hive), Pandas, NumPy
- **Data Visualization:** Power BI, DAX, Tableau
- **Dev Tools:** Git, GitHub

Experience

Compunnel Inc. **Jan. 2025 – Present**
Data Science Intern (On-site, Noida)

- **Role & Responsibilities:** Working as a Data Science Intern at Compunnel Inc., building production-ready AI applications by developing backend services, integrating LLMs into enterprise workflows, and implementing document intelligence and RESTful APIs for automation and conversational systems.
- **NCC Intelligence Platform (Client Project)**
  * Engineered an enterprise-grade email automation pipeline using **AWS Bedrock (Claude)** and Groq-hosted LLaMA to extract actionable tasks from Gmail threads with 85
  * Built a **multi-format document processing pipeline** using PyPDF2, python-docx, and **Tesseract OCR** to extract structured data from scanned and digital **PDF, DOCX, and TXT** attachments under **LLM API payload constraints**.
  * Architected RESTful backend services using FastAPI and PostgreSQL, implementing NLP-based date inference, automated desk routing, dynamic priority assignment, and email relevance classification using weighted scoring algorithms.
- **SmartAudit AI (Internal Agent-Based System)**
  * Developed an **AI-powered invoice auditing system** using **multiple cooperating agents** for data ingestion, validation, anomaly detection, summarization, and **conversational querying** across CSV and PDF invoices.
  * Implemented **hybrid rule-based and LLM-assisted audit logic** to detect **calculation errors**, **duplicate invoices**, **missing fields**, **compliance violations**, and suspicious financial patterns.
  * Designed a stateful conversational AI interface enabling users to interact with audit findings through context-aware queries and role-specific summaries (legal, managerial, accounting)
- **Tech Stack** Python, FastAPI, PostgreSQL, Streamlit, AWS Bedrock, Groq (LLaMA), Mistral AI, SQLAlchemy, Pandas, PyPDF2, Tesseract OCR, OAuth2, Git

Prodigy InfoTech *(View Certificate)* **Jun. 2024 – Jul. 2024**
Data Science Intern *(Remote)*

Performed data preprocessing, exploratory data analysis (EDA), and machine learning model development using Python.

Projects

HR Analytics Dashboard — Power BI, DAX, Data Visualization **April 2025**

* **D**esigned a Power BI dashboard reducing manual reporting by **35%** and improving decision-making efficiency.
* Project Link

Certifications

- **Build Real World AI Applications with Gemini and Imagen**
  Google, May 2025
  View Credential
- **Prompt Design in Vertex AI Skill Badge**
  Google, May 2025
