Kartik Mehta

Global AGM – IT Infrastructure & Service Delivery @ ECU Worldwide

Mobile: +91 9884260566

Email: kartik-mehta@live.com

Andheri, Mumbai

Professional Summary

Strategic IT Infrastructure & Cloud Transformation Leader with global experience in data center operations, hybrid cloud adoption, and enterprise service delivery. Led large, cross-functional engineering teams across multi-region environments, driving AWS/Azure migrations, operational excellence, and resilient high-availability architectures. Proven ability to align infrastructure strategy with business growth, strengthen cybersecurity infra and ops, and standardize governance frameworks across complex global enterprises.

#OldSkool: Seasoned professional in drafting emails, crafting reports, and updating resumes, long before the conceptualization of generative Ai.

Work Experience Timeline

● ***ECU Worldwide - Global Logistics - Aug 2023 – Aug 2024***

Global AGM – IT Infrastructure & Service Delivery, (Cloud Migration & Operation)

- Handled multi-region IT infrastructure operations across global data centers and hybrid cloud environments, ensuring high availability, operational resilience, and SLA-driven service delivery.
- Managed enterprise-wide cloud transformation strategy, driving migration of legacy workloads to AWS and Microsoft Azure platforms, optimizing performance, scalability, and total cost of ownership.
- Managed large-scale cloud migration programs, including assessment, architecture redesign, workload replat forming, and production cutover for mission-critical logistics systems.
- Managed cybersecurity posture and compliance governance, implementing security controls, access frameworks, and audit-ready infrastructure aligned with global regulatory requirements.
- Worked on global stakeholder engagement and executive alignment, acting as the bridge between IT operations, regional business heads, and corporate leadership.
- Established Disaster Recovery (DR) and Business Continuity (BCP) frameworks, conducting failover testing, resilience drills, and high-availability architecture validation.
- Operated hybrid and multi-cloud adoption, integrating on-prem data centers with AWS and Azure ecosystems to enhance scalability, performance, and geographic redundancy.
- Established centralized Global Infrastructure Management Framework, standardizing operational policies, patch management, asset lifecycle, and performance monitoring across regions.
- Led Infrastructure cost optimization initiatives across data centers and cloud platforms, improving utilization, rightsizing workloads, and reducing operational expenditure.
- Strengthened vendor management and strategic partnerships, negotiating SLAs and driving accountability across cloud, telecom, and managed service providers.
- Drove infrastructure modernization initiatives including virtualization expansion, network segmentation, identity governance, and zero-trust-aligned access controls.

● ***Canon Medical Systems EU - Dec 2021 – Feb 2023***

Senior Service Delivery Manager (Cloud & Applications)

- Led and managed a 28-member cross-functional software engineering team at Canon Medical Systems Europe B.V., overseeing operations, service delivery, and performance governance across enterprise platforms.
- Owned end-to-end delivery and operational stability across Service, Salesforce, Finance, Logistics, OBIEE, Fusion, Reporting, MyAnalytics, and Integration platforms, ensuring SLA adherence and business continuity across EU operations.
- Planned, created, and standardized the division-wide reporting governance framework, consolidating fragmented reporting streams into a unified, structured executive reporting model.
- Implemented KPI dashboards and operational metrics across Salesforce-heavy environments, improving transparency across Sales, Service, and Logistics functions.
- Directed multi-system integrations between Salesforce, Oracle Fusion, Finance, and Logistics platforms, improving data accuracy and cross-functional visibility.
- Established structured incidents, change, and release governance across distributed teams, enhancing delivery predictability and reducing operational risk.
- Acted as the primary escalation and stakeholder interface for business leadership, aligning IT operations with commercial, service, and financial objectives.

● ***Cisco Systems India - Feb 2015 – March 2020***

High Touch Operations Manager : HTOM ***(Data Centre Managed Services:*** *Enterprise, BFSI, Service Provider, Oil & Gas, Healthcare, NBFI)*

- Delivered end-to-end Cisco HTOM managed services for large enterprise, telecom, BFSI, and healthcare clients including TCS, HCL, Infosys, HDFC Bank, JPMorgan, NSE, and Cerner, supporting multi-site Tier III/IV data center environments.
- Led Greenfield Data Center deployments, including rack-level design validation, Cisco Nexus & UCS stack implementation, SAN integration, and production cutover with zero business disruption.
- Managed 24x7 ongoing DC operations covering incident, problem, change, and capacity management across core routing, switching, firewall, load balancers, and virtualization layers.
- Data Center refresh & upgrade programs (hardware lifecycle, OS upgrades, firmware standardization, migration to new Cisco Nexus platforms), reducing technical debt and improving availability SLA compliance.
- Coordinated with cross-functional teams for DC consolidation and migration projects, including workload migration, DR drills, failover validation, and performance benchmarking.
- Implemented proactive monitoring, root cause analysis, and automation initiatives that improved MTTR, enhanced uptime, and strengthened security posture in regulated BFSI and telecom environments.
- Supported high-availability architectures including multi-DC redundancy, active-active designs, and disaster recovery frameworks aligned with client compliance and audit requirements.

● ***XcellHost Cloud Services Pvt. Ltd. - Jun 2013 – Jan 2015***

Senior IT Operations & Service Delivery Manager

- Led a 60-member multi-disciplinary cloud operations team at XcellHost Cloud Services, overseeing Windows Operations, Windows Deployment, Network Engineering, Exchange Administration, Database Management, Linux Operations, and shared infrastructure services.
- Owned end-to-end cloud infrastructure operations and service delivery, ensuring 24x7 availability, SLA compliance, and performance optimization across hosted enterprise environments.
- Directed large-scale Windows server deployments, Active Directory architecture, virtualization platforms, and infrastructure lifecycle management, supporting multi-tenant cloud customers.
- Governed enterprise network operations, including routing, switching, firewall management, VPNs, and secure multi-site connectivity across hosted environments.
- Oversaw Exchange environments, database platforms (SQL/other), and Linux server estates, ensuring high availability, backup integrity, disaster recovery readiness, and patch governance.
- Implemented structured ITIL-based incident, problem, and change management frameworks, significantly improving MTTR, operational discipline, and audit readiness.
- Standardized reporting, operational KPIs, and performance dashboards across all technical verticals, bringing visibility and accountability to cross-functional cloud teams.
- Acted as senior escalation point for enterprise clients, aligning infrastructure delivery with business continuity, security, and growth objectives.

● ***Gifts4Me.in India Pvt. Ltd. - Jun 2012 – May 2013***

IT Operations Manager

- Managed the **entire IT setup** of the company, both internal systems and external customer-facing applications.
- Overall, in charge of **all recruitment** across all functions & levels.
- Planned and executed **business technology projects**, covering content, analytics, and customer rollouts.
- Built **a culture of innovation** within the IT team for product enhancement.
- Led **hiring & management of a developers and database team.**

Education & Certifications

- **Professional Program in Cloud Computing and DevOps** – IIT Guwahati (Oct 2025 - June 2026)
- **B. Tech in Information Technology** – William Carey University, Shillong (2011)
- **ITIL Foundation Certification (PeopleCert)** – 2020
- **CCNA Training – Cisco Certified**

Certifications & Skills

• ITILv3 Certified Professional	• Managed Services Expertise (Onsite & Remote)
• Service Delivery & IT Operations Management	• Multi-Site IT Operations Leadership
• Project & Stakeholder Management	• Cybersecurity & Compliance
• Disaster Recovery & Business Continuity Planning	• Cloud Infrastructure (Azure, AWS, Google Cloud)
• ITSM & Change Management	• Greenfield Projects

Personal Details

- **Date of Birth:** 17th December 1986
