Experiences

Mindsprint | Senior Software Developer - Data | Sep 2024 - Present
- Orchestrated data modeling and ETL processes using Tableau Prep, Power Query, and Power Pivot
- Developed advanced SQL queries and database views to enhance system performance and data accessibility
- Executed seamless dashboard migrations between Tableau and Power BI while maintaining 100% data integrity
- Developed Power BI Paginated Reports to deliver high-fidelity, print-ready insights for executive stakeholders
- Led cross-functional teams through the full project life-cycle, ensuring on-time delivery of all technical milestones
- Collaborated with clients to translate business requirements into actionable, technical data solutions
- Optimized DBT documentation and work-flows to streamline development and improve code transparency

Tiger Analytics | Senior Analyst - BI | Jan 2023 - Sep 2023
- Developed and optimized SQL queries for efficient extraction, cleansing, and analysis of large-scale data-sets
- Implemented scalable Business Intelligence solutions to drive data-led decision-making for critical business sectors
- Leveraged Power Query and Power Pivot to orchestrate advanced data transformation and robust data modeling
- Identified and defined strategic KPIs tailored to specific client needs and performance tracking goals
- Developed interactive, high-performance dashboards and reports using both Tableau and Power BI
- Authored comprehensive technical and business documentation to bridge the gap between data and stakeholders

Infosys Ltd. | Associate Consultant | Aug 2021 - Dec 2022
- Facilitated communication between developers and clients to ensure rapid issue resolution and project alignment
- Managed the full project life-cycle, including requirements analysis, technical design, implementation, and documentation
- Authored BRDs, FRDs, DFDs, and Wire-frames to translate client needs into actionable technical requirements
- Applied deep industry knowledge to align business models with evolving customer needs and strategic goals
- Performed data-driven gap analysis to identify inefficiencies and recommend high-impact corrective strategies

Infosys Ltd. | Senior Systems Engineer | Apr 2020 - Aug 2021
- Identified and resolved technical issues across the Microsoft Office 365 suite to ensure operational continuity
- Streamlined automated reporting and delivered data-driven insights to optimize incident response work-flows
- Collaborated with SMEs and stakeholders to elicit, analyze, and validate technical and business requirements
- Applied a structured, data-centric approach to problem-solving and process improvement

Infosys Ltd. | Systems Engineer | Aug 2018 - Apr 2020

- Managed system enhancements and maintenance for a global-scale configurator application within the manufacturing sector
- Served as the primary point of contact between global clients, internal cross-functional teams, and external vendors
- Resolved multi-priority incident tickets by aligning technical fixes with specific business requirements
- Monitored data pipelines to ensure 100% timely delivery to customers, consistently meeting strict SLA requirements

Certifications
