Muruga Prasaad MD

9597826375 @ murugaprasaad@gmail.com

Summary

A highly motivated and results-oriented **Data Scientist** with 3 years of experience in advanced analytics. Proficient in managing the **end-to-end analytics lifecycle**, from **data wrangling** to **model deployment**. Skilled in using **Python**, **SQL**, and key machine learning frameworks like **scikit-learn** and **TensorFlow** to design predictive models and build robust **data pipelines** and dashboards for real-time monitoring. Excellent communication and collaboration skills with a proven ability to partner with **domain experts** and operational teams to implement scalable, data-driven solutions. Eager to apply my expertise in a dynamic, multidisciplinary environment.

Skills

Python, MySQL, ETL, PowerBI, AWS, Data Analysis, TensorFlow, PyTorch

Analytical, Team Player, Project Management, Time Management, Problem-solving, Excellent Communication, Client Handling

Projects

Food Waste Management System **June 2025**

- **Platform Development:** Led the end-to-end development of a web application designed to streamline the management of surplus food. The system allows users to post available food items, and other users can efficiently claim and manage these items through a seamless digital workflow.
- **Geolocation & Data Management:** Built a core functionality that leverages geolocation APIs to accurately map food item locations, enabling users to find nearby donations. The system's back-end was architected to ensure robust data management, allowing for secure storage and efficient querying of all user and item data.
- **Analytics & UI:** Created a user-centric front-end with advanced filtering options and interactive data visualizations. This empowered users with the ability to quickly search for specific food types, view historical donation trends, and gain insights into the platform's overall impact on food waste reduction.

Python, MySQL, Streamlit, Pandas, Matplotlib

Video Game Analysis **July 2025**

- **Market Analysis:** Conducted comprehensive market research to identify high-performing game genres and platforms. This analysis informed a targeted marketing strategy, optimizing promotional efforts and increasing potential user reach by focusing on key segments of the market.
- **Product Strategy:** Developed data-driven recommendations for new features and long-term development pipelines. By analyzing player engagement and market trends, I helped shape a product strategy designed to maximize commercial success and long-term player retention.
- **Sales Forecasting:** Created detailed sales forecasts by analyzing historical game performance and wishlist data. This enabled more efficient resource allocation, helped secure a larger marketing budget, and provided accurate demand signals for production planning.

Python, Power BI, Data Cleaning, SQL, Data Visualization, Exploratory Data Analysis (EDA)

Medical Insurance Cost Prediction **Aug 2025**

- **Data & Model Development:** Conducted thorough data preprocessing and exploratory data analysis (EDA) to train and evaluate multiple regression models for predicting medical insurance costs.
- **Application & Deployment:** Deployed the most accurate model into a user-friendly Streamlit application, providing a real-time tool for users to receive estimated insurance costs based on their inputs.
- **MLOps & Experiment Tracking:** Utilized MLflow to manage and track the entire project lifecycle, ensuring all experiments and model versions were reproducible and well-documented.

Python, Streamlit, Machine Learning, EDA, Data Analysis, Data Preprocessing, MLflow

Human Voice Classification and Clustering **Aug 2025**

- **Model Development:** Developed a machine learning model to classify and cluster human voice samples based on features such as pitch, spectral contrast, and MFCCs (Mel-Frequency Cepstral Coefficients).
- **Data Processing & Engineering:** Preprocessed raw audio data and performed feature engineering, selection, and normalization to prepare the dataset for machine learning models.
- **Application & Deployment:** Built a Streamlit application that allows users to upload audio files and receive real-time predictions for speaker identification and gender classification.

Machine Learning, Pre Processing, Feature Engineering, Feature Selection, Clustering, Classification, Model Evaluation, Streamlit, Python

Experience

Talent Recruit Software Private Limited **Sep 2024 - Present**
Senior Consultant Bengaluru

- Analyzed and optimized software implementation processes, directly contributing to a 95% client satisfaction rate and a 15% reduction in onboarding time.
- Collaborated with cross-functional teams (product, engineering, and client stakeholders) to gather requirements and ensure seamless data flow and successful project delivery.
- Translated user feedback into actionable data for product improvement, providing detailed documentation and identifying key areas for optimization through data analysis.

Mainstay People Consulting LLP **May 2023 - Aug 2024**
Implementation Consultant Bengaluru

- Analyzed client business requirements to define data-driven solutions, demonstrating strong analytical and problem-solving abilities in designing tailored software.
- Designed data solutions for diverse business scenarios, showcasing adaptability and the ability to handle complex data problems.
- Coordinated with development teams to define and implement client-specific change requests, effectively bridging the gap between business needs and technical solutions with a focus on data integrity and functionality.

Sterlite Technologies Limited **Jul 2022 - Mar 2023**
Graduate Engineer Trainee Bengaluru

- Developed and maintained data pipelines and tools to automate report generation and operational tasks, significantly improving data efficiency and accuracy.
- Applied technical expertise to analyze and troubleshoot complex data-related problems, implementing solutions and contributing to innovative process improvements.

Education

Sathyabama Institute of Science and Technology **Aug 2018 to Jun 2022**
Computer Science and Engineering Bachelors of Engineering

Maharishi Vidya Mandir School **Jun 2017 to May 2018**
Science Stream Class 12 (CBSE)

Volunteering

Toastmasters International **Oct 2022 - Present**

An active member of the Toastmasters club, where I currently serve as the **Vice President - Education**, a role focused on member development and club success. I am also part of the **Program Quality Director Extended Team**, contributing to the broader district's quality standards.
