

Abhijeet Devidas Sangle

Power BI Developer

Mob No 91- 8976365575

Sangale.abhijit@gmail.com

Professional Summary

Power BI Developer with 5.9+ years of experience in designing enterprise-level dashboards, data visualization, business intelligence solutions, and analytics reporting across Finance, HR, Lounge Operations, Supply Chain, Incentive Management, and Elite Club membership domains. Skilled in developing interactive dashboards using Microsoft Power BI, advanced DAX, Power Query, SQL, and Power Platform technologies to deliver actionable business insights and improve decision-making. Experienced in dashboard optimization, data modeling, governance, RLS implementation, ETL integration, and enterprise reporting solutions.

Professional Experience

Power BI Developer

I-source Info System Pvt Ltd, Pune

Dec 2024- April 2026

- Designed and developed advanced Power BI dashboards using complex DAX, dynamic parameters, and scenario-driven business logic.
- Gathered and analyzed business requirements from cross-functional stakeholders, ensuring that all reports and visualizations aligned with organizational goals and delivered relevant KPIs.
- Monitored and optimized Power BI datasets, DAX queries, semantic models, and report behavior to enhance report responsiveness and reduce refresh times.
- Conducted end-to-end troubleshooting and root cause analysis for dashboard failures, refresh issues, gateway connectivity problems, and server performance bottlenecks.
- Built dynamic slicers using parameter tables, supporting scenario filtering (ACTatPLAN, PLAN, FCST, etc.).
- Implemented governance best practices including role-based access control (RBAC), audit monitoring, workspace management, and data security compliance.

Finance Dashboard

- Developed executive-level finance dashboards for revenue tracking, profitability analysis, budget utilization, and financial KPI monitoring.
- Built Actual vs Forecast reporting with variance analysis using advanced DAX calculations.
- Created drill-through reports for department-wise expense and revenue analysis.

Incentive Dashboard

- Developed incentive calculation dashboards to track employee

Technical Skills

- **Data Visualization Tools:** Power BI, Advanced DAX, Power Query, Tableau, Power Apps, Power Platform
- **Database & ETL:** SQL Server, MySQL, Azure Data Factory
- **Programming Languages:** DAX, SQL, Python (basic)
- **BI & Data Analysis:** Data Modeling, Data Warehousing, ETL Process
- **Cloud Platforms:** Microsoft Azure, Power BI Service
- **Business Skills:** Agile Methodology, Business Process Optimization, Requirements Elicitation, Stakeholder Management
- **Other Skills:** Agile Methodology, Business Process Analysis, Requirements Gathering, Sigma

EDUCATION:

M.E. (Mechanical Engg.) Mumbai University, Mumbai Jan 2018
CGPA: 8.16 /10

B.E. (Mechanical Engg.) SVIT, Pune University ,23 Sep 2011, 62.46%

- incentive payouts, achievements, targets, and performance metrics.
- Built dynamic KPI scorecards and ranking visuals for leadership visibility.
- Implemented row-level security for role-based access.

Power BI Analyst

Senvion India (Payroll-Adecco India), Mumbai

Jun 2024 – Dec 2024

- Conducted knowledge transfer sessions with end-users to explain dashboard functionalities, enable data-driven decision-making, and enhance business intelligence practices.
- Transformed static Excel reports into dynamic Power BI dashboards, streamlining reporting processes.
- Conducted data profiling and cleansing initiatives, resulting in an improvement in data accuracy and relevance for reporting.
- Assisted in developing data dictionaries and supporting documentation, enhancing data transparency and reducing onboarding time for new analysts.
- Utilized Power Query in Power BI to Pivot and Unpivot the data model for data cleansing and data massaging
- Implemented RLS (Row Level Security) on many reports by using Manage Roles and adding users into those roles in Power BI Service as per the Business Requirements.
- Executed platform upgrades, patch management, migration activities, and environment validation with minimal business disruption.

Major Projects

HR Dashboard

- Developed HR analytics dashboards for employee attrition, headcount analysis, attendance tracking, hiring metrics, and workforce trends.
- Designed employee performance and department-wise workforce analysis reports.
- Automated HR reporting and improved visibility into employee KPIs.

Supply Chain Dashboard

- Built supply chain analytics dashboards for inventory monitoring, procurement tracking, vendor analysis, and logistics KPIs.
- Developed real-time tracking reports for operational efficiency and stock optimization.
- Created delay analysis and procurement performance metrics.

T-Web Exponent, Kolkata

Feb 2024 – May 2024

- Facilitated KPI analysis by partnering with stakeholders to define metrics and translate business requirements into actionable BI solutions.
- Enhanced dashboard performance through DAX optimization and improved query structuring, reducing load time and improving user experience.
- Developed static and dynamic visuals to meet comprehensive reporting needs across multiple departments.

Core Competencies

- Power BI Dashboard Development
- Advanced DAX & Data Modeling
- Power Query & ETL Transformation
- KPI & Executive Reporting
- Forecasting & Variance Analysis
- Tableau to Power BI Migration
- Power BI Service Administration
- Row Level Security (RLS)
- SQL Troubleshooting & Optimization
- Power Platform & Power Automate
- Stakeholder Management
- Dashboard Performance Optimization

- Collaborated closely with data engineering teams to develop ETL pipelines, enhancing data consistency and establishing robust data lineage.
- Developed various solution driven views and dashboards by developing different chart types including Pie Charts, Bar Charts, Tree Maps, Circle Views, Line Charts, Area Charts, Scatter Plots in Power BI.

Junior Data Analyst

Mind Spark Technologies,Pune

Jun 2020 – Jan 2024

- Architected and optimized Power BI dashboards to enhance data-driven insights into KPIs, including Sales, Finance, and Operations, achieving a noticeable increase in stakeholder engagement.
- Migrated legacy dashboards from Tableau to Microsoft Power BI, optimizing data models and improving performance.
- Recreated Tableau visualizations using Power BI, ensuring metric consistency and business logic validation.
- Integrated Power BI with disparate data sources, including Azure Data Lake and SQL Server, to build a centralized reporting hub that provided real-time data access.
- Maintained documentation for data sources, transformation processes, and dashboard features, streamlining future updates, and knowledge sharing.
- Developed and published standard or custom Power BI reports summarizing business data for reviewed by executives, managers, clients, and other stakeholders

Major Projects

Lounge Industry Dashboard

- Built operational dashboards for lounge business performance analysis including sales, revenue, occupancy trends, customer traffic, and transaction analysis.
- Developed banking and card transaction analysis reports.
- Created Target vs Actual and Margin % dashboards for operational leadership.
- Implemented year-over-year sales trend analysis and business forecasting visuals.

Previous Experience:

Assistant Prof / 12.2011 – 12.2019 (YTCEM,Karjat)

Dedicated Mechanical Engineering Professor with a decade of expertise in curriculum design, student mentoring, and technical research.
